

QMED Oiler Training

Classes begin Sept. 13, 2010

At

AVTEC

Port Road Facility, Seward

Instructor, Eric Clock

AVTEC-Alaska's Institute of Technology will be starting a Marine Oiler Class in their Maritime Department, on September 13, 2010. This is a U.S. Coast Guard approved course. In order to fulfill all of the Qualified Member of Engine Department (QMED) requirements, the applicant must also present documentation showing at least 180 days engine room sea time, and the training requirements of 46 CFR 12.15-3 (e) and Section A-111/4 and Table A-111/4 of the STCW Code, plus Basic Safety Training.

This course is designed to familiarize the student with propulsion, power generation and auxiliary systems on Motor and Steam ships. They will also be instructed on skills that the QMED-Oiler will be expected to perform in assisting with watch-standing and repairs on a typical ocean going ship.

QMED-Oilers are in demand on ships such as: State Ferries, Oil and LNG Tankers, Container and Passenger Ships, and Car Carriers. Persons working on smaller vessels will also be able to benefit from the practical skills learned in this course. The normal progression path in the Engine Departments is from Wiper, to QMED-Oiler, to Engineer.
